

Presentations on these otitis media topics are welcome:

Acute otitis media	Epidemiology	New treatment
Advocacy	Eustachian tube dysfunction	Non-coding RNAs & epigenetics
Animal models	Genomics & genetics	Otopathogens: bacterial, viral & fungal
Antimicrobial management	Health policy	Particulate matter effects
Artificial intelligence	Hearing loss	Preventive strategies
Biofilms	Imaging	Proteomics
Cell lines & organoids	Immunology	Quality of life and sequelae
Cholesteatoma	Indigenous/First Nations/Aboriginal peoples	Recurrent acute otitis media
Chronic otitis media with effusion	Lived experiences	Service delivery
Chronic suppurative otitis media	Low-resource settings	Surgical advances
Clinical practice guidelines	Metabolomics	Transcriptomics
Clinical trials	Microbiology & microbiome	Translational research
Community & consumer involvement	Middle ear physiology	Transtympanic drug delivery
Community-based practice	Mucins	Tympanic membrane perforation
Diagnostics	Multi-omics	Vaccines
